- JOURNAL PUBLICATIONS [1] J. Rantaharju, T. Rindlisbacher, K. Rummukainen, A. Salami, K. Tuominen, *Spectrum of $SU(2)$ gauge theory at large number of flavors*, Phys. Rev. D 104, 114504 (2021), *arXiv:2108.10630 [hep-lat]* .
- (CO-AUTHOR) [2] E. Asvestari, T. Rindlisbacher, J. Pomoell, E. Kilpua, *The spheromak tilting and how it affects modelling coronal mass ejections*, Accepted for publication in ApJ, *arXiv:2111.08770 [astro-ph.SR]*
- [3] V. Leino, T. Rindlisbacher, K. Rummukainen, F. Sannino and K. Tuominen, *Safety versus triviality on the lattice*, Phys. Rev. D 101, 074508 (2020), *arXiv:1908.04605 [hep-lat]* .
- [4] T. Rindlisbacher, P. de Forcrand, *Worm Algorithm for the \mathbb{CP}^{N-1} Model*, Nucl. Phys. B 918 (2017) 178-219, *arXiv:1610.01435 [hep-lat]* .
- [5] T. Rindlisbacher, O. Åkerlund, P. de Forcrand, *Efficient Sampling of General Correlators in Worm Algorithm-based Simulations*, Nucl. Phys. B 909 (2016) 542-583, *arXiv:1602.09017 [hep-lat]* .
- (CO-AUTHOR) [6] O. Åkerlund, P. de Forcrand, T. Rindlisbacher, *Oscillating propagators in heavy-dense QCD*, JHEP 10 (2016) 055, *arXiv:1602.02925 [hep-lat]* .
- [7] T. Rindlisbacher, P. de Forcrand, *Two-Flavor Lattice QCD with a Finite Density of Heavy Quarks: Heavy-Dense Limit and "Particle-Hole" Symmetry*, JHEP 02(2016) 051, *arXiv:1509.00087 [hep-lat]* .
- [8] T. Rindlisbacher, P. de Forcrand, *Euclidean Dynamical Triangulation revisited: is the phase transition really 1st order? (full version)*, JHEP 05 (2015) 138, *arXiv:1503.03706 [hep-lat]* .
- CONFERENCE PUBLICATIONS [9] T. Rindlisbacher, K. Rummukainen, A. Salami, *Bulk-preventing actions for $SU(N)$ gauge theories*, PoS (LATTICE 2021) 576, *arXiv:2111.00860 [hep-lat]* .
- (CO-AUTHOR) [10] J. Rantaharju, T. Rindlisbacher, K. Rummukainen, A. Salami, K. Tuominen, *$SU(2)$ gauge theory with $N_f=24$ quarks at non-zero mass*, PoS (LATTICE 2021) 025, *arXiv:2111.01618 [hep-lat]* .
- [11] T. Rindlisbacher, P. de Forcrand, *Spin models in complex magnetic fields: a hard sign problem*, DOI: 10.1051/epjconf/201817507026, *arXiv:1711.00042 [hep-lat]* .
- [12] T. Rindlisbacher, P. de Forcrand, *A Worm Algorithm for the Lattice \mathbb{CP}^{N-1} Model*, PoS (LATTICE 2016) 085, *arXiv:1703.08571 [hep-lat]* .
- [13] T. Rindlisbacher, P. de Forcrand, *Lattice simulation of the $SU(2)$ -chiral model at zero and non-zero pion density*, PoS (LATTICE 2015) 171, *arXiv:1512.05684 [hep-lat]* .
- [14] T. Rindlisbacher, P. de Forcrand, *Euclidean Dynamical Triangulation revisited: is the phase transition really 1st order?*, PoS (LATTICE 2013) 096, *arXiv:1311.4712 [hep-lat]* .

- PRE-PRINTS [15] T. Rindlisbacher, K. Rummukainen, A. Salami, K. Tuominen, *Non-perturbative decoupling of massive fermions*, (2021), arXiv:2110.13882 [hep-lat].
- [16] T. Rindlisbacher, *Infinite-range correlations in 1D systems with continuous symmetry*, (2020), arXiv:2012.03396 [hep-lat].
- PHD THESIS [17] T. Rindlisbacher, *Lattice Field Theory at Finite Density*, DOI: 10.3929/ethz-b-000167730. .
- CONFERENCE TALKS [18] T. Rindlisbacher, *Bulk-preventing actions for SU(N) gauge theories*, Lattice 2021, Zoom/Gather @Massachusetts Institute of Technology, USA.
- [19] T. Rindlisbacher, *Finite density on the lattice: problems and (some) solutions*, Fire and Ice Workshop 2018, Saariselkä, Finland.
- [20] T. Rindlisbacher, *Spin models in complex magnetic fields: a hard sign problem*, Lattice 2017, Granada, Spain.
- [21] T. Rindlisbacher, *A Worm Algorithm for the Lattice $\mathbb{C}P^{N-1}$ Model*, Lattice 2016, Southampton, UK.
- [22] T. Rindlisbacher, *Strong coupling approach to bound states*, DELTA 2016, Heidelberg, Germany.
- [23] T. Rindlisbacher, *Improved Mean-Field Method for Lattice QCD at Finite Density*, SIGN 2015, Debrecen, Hungary.
- [24] T. Rindlisbacher, *Lattice simulation of the SU(2)-chiral model at zero and non-zero pion density*, Lattice 2015, Kobe, Japan.
- [25] T. Rindlisbacher, *QCD with Wilson fermions and an isospin chemical potential at zero and finite temperature*, Lattice 2014, New York, USA.
- [26] T. Rindlisbacher, *Euclidean Dynamical Triangulation revisited: is the phase transition really 1st order?*, Lattice 2013, Mainz, Germany.
- SEMINAR TALKS (INVITED) [27] T. Rindlisbacher, AEC lunch seminar at University of Bern, November 2021, Switzerland.
- [28] T. Rindlisbacher, *The Worm Algorithm in Lattice Field Theory*, Seminar talk at University of Regensburg, May 2016, Germany.
- [29] T. Rindlisbacher, *Recent Work on Euclidean Dynamical Triangulation*, Seminar talk at Radboud University Nijmegen, December 2015, Netherlands.
